EcoVara

REPLICATING NATURE, ARTFULLY

Where nature meets consistency
Natural elements are an essential part of modern luxury design. But even though Nature's designs are unmatched, they are also ever transitional: verdant greenery is vibrant one day, withered the next. With this in mind, EcoVara has conceptualized and created a range of faux botanicals that mixes the fresh, lifelike appearance of real plants with the consistent, pliable features of man-made and blended materials.

Chic designs that moonlight as solutions
EcoVara faux botanicals, available in simple designs and artful compositions, can be partially or fully customized to fit any space and design identity. Our eco-conscious products are perfect for any design plan, whether it's a posh private residence, a luxury hotel, or a world-class resort. And since our plant creations are equal measures art and function, they have the ability to add visual interest to a space while also defining it and improving its flow.

A distinctive partnership tailored to your needs
In an effort to provide exclusive plant designs to our discerning clients, EcoVara has paired with its perfect counterpart and complementary brand, Stone Yard, Inc. Combining EcoVara's high-end plant creations with Stone Yard's handcrafted, one-of-a-kind cast and faux stone planters creates evocative design elements that replicate nature artfully.

PATIO TREES

DECORATIVE | SMALL TO MID-SIZED | EXCELLENT ACCENTS

Even in the harsh light of day, our realistic patio trees blend in and yet stand out with their ever-beautiful foliage. Group smaller trees around your seating area for a cozy nook, or place a towering tree in a neighbor's sightline to make your yard a private haven.

HOW TO ORDER

You can further customize your plant creations with handcrafted cast and faux stone planters. Choose from a variety of materials, textures, and colors.

INDOOR & OUTDOOR

MATERIALS

GFRC | FIBERSTONE | SYGLOS

GFRC (GLASS FIBER REINFORCED CEMENT)

Made from a precise mixture of high-grade cement reinforced with glass fiber and other additives, GFRC has the appearance of natural stone but is lighter in weight and more durable.

FIBERSTONE

Our fiberstone products use a proprietary process that combines glass fiber, polyester resins, and aggregate materials, creating the look of stone but at a fraction of the weight of both stone and GFRC.

SYGLOS

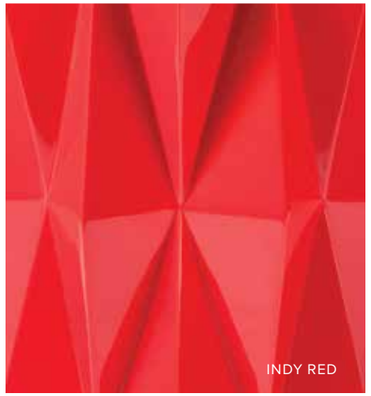

SyGlos is a material composed of marine-grade, high-gloss resin colors. It's modern, glossy finish has a base material of durable fiberstone, for pieces that are durable in structure and contemporary in design.
